GENERAL CATALOGUE

Spring / Summer

The 2nd generation Alpine Halo series is here

The Alpine Halo9 has become one of the world's most popular Head Units and won many industry awards for its outstanding concept and design. We continued to improve upon this successful product and made it even better. The 2nd generation lineup includes the new Alpine Halo11, featuring a gigantic XXL 11-inch screen. Both versions use a high-res WXGA display, Wireless Apple CarPlay, two USB ports, further improved sound quality and tuning options, as well as many more innovations and improvements.

iLX-F905D DIGITAL MEDIA STATION

9"

Product features and specs are identical to iLX-F115D, but includes a 9" (23cm) WXGA Touch-Screen.

WXGA
1280 x 720p

11-inch XXL display: the gigantic WXGA touch-screen display features a resolution of 1280 x 720p and includes over 2.7 million pixel elements - making icons, menus and visual content extremely crisp and vibrant in your dash.

Wireless Apple CarPlay

Works with Apple CarPlay

Both the iLX-F115D and the iLX-F905D are wirelessly compatible with Apple CarPlay and let iPhone users access their music, navigation and communication apps. Due to the WiFi connection, you can keep your iPhone in your pocket (except for charging).

2x USB Ports

2xUSB

2 USB ports located on the back of both units allow you for example to connect one mobile device for charging, while the other USB port is used to plug in a USB stick or hard drive to access audio and video files.

Enjoy Excellent Sound Quality

Class-D

The 2nd generation Alpine Halo models are the world's first aftermarket Head Units featuring a built-in Class-D amplifier for excellent sound quality. They can also playback Hi-Res Audio files up to 96kHz / 1.536 kbps from USB sources and include many professional sound tuning options.

Hi-Res AUDIO

User-adjustable Display

With five vertical adjustments, free angle selection, and two separate depths, you can position the floating display in the most optimal position. The user now can freely adjust the display angle also after installation, to achieve best visibility.

Drive-Assist Cameras & Vehicle Connection

2 direct camera inputs allow the connection of Alpine front and rear camera systems. Alpine also offers many vehicle data-bus interfaces to connect your Alpine Halo system to your vehicle's data-bus. This enables usage of your vehicle's steering wheel control buttons, display of air conditioning settings as well parking sensor display.

Recommended Accessories

RUE-BK01
WIRELESS VOLUME CONTROLLER

Can be attached to the left or right side of your Alpine Halo11 or Halo9 display for easy access. This controller can not be used when wireless Apple CarPlay is in use.

Built-in Navigation with TomTom Maps

The built-in iGo Primo nextgen navigation system uses TomTom maps and comes with pre-installed maps for 46 European countries. Select from hundreds of thousands of POIs to find anything you are looking for. You can frequently update your TomTom maps database free-of-charge for the first 3 years, then you can purchase map update packages at a very reason-able price.

1DIN Chassis – 9" Screen

The INE-F904D features a 1DIN chassis, making it immediately compatible with any vehicle with either 1DIN or 2DIN radio dock. The touch-screen is attached to the front of the media box with steel brackets to achieve a rock solid display.

Works with Apple CarPlay and Android Auto

Simply connect your smartphone to the USB port of your Alpine Halo9 Navi and launch Apple CarPlay or Android Auto to communicate, navigate and stay entertained with your favourite smartphone apps. Use Apple maps, Google maps, Waze, Spotify, Amazon Music, Google Play Music,What's app and many other popular apps right on your 9-inch touch-screen.

Works with Apple CarPlay

android auto

Drive-Assist Cameras & Vehicle Connection

1 camera input allows the connection of an Alpine front or rear camera systems. With the KCX-250MC you can even connect up to 3 cameras to the Head Unit. Alpine also offers many vehicle data-bus interfaces to connect your Alpine Halo system to your vehicle's data-bus. This enables usage of your vehicle's steering wheel control buttons, display of air conditioning settings as well parking sensor display.

X803DC-U ADVANCED NAVI STATION

8"

Product features and specs are identical to X803D-U, but include motorhome software & profiles and park4night & Boardatlas databases.

Built-In Navigation and Online Navigation

The X803D-U and INE-W720D feature a built-in iGO Primo Nextgen navigation system with pre-installed TomTom maps. Thanks to Apple CarPlay and Android Auto, you also have the alternative of online navigation and can use Waze, Google Maps, Apple Maps and other popular navigation apps.

iGO Primo Nextgen with TomTom Maps

Navigation by Apple CarPlay (Waze)

8-inch Screen with 1 DIN chassis

Many vehicles feature dashboard space for a 7-inch or 8-inch screen, however behind the screen there is no space to fit a full 2DIN product. Alpine designed the X803D-U to overcome this problem by putting a 1DIN chassis in the back of an 8-inch screen.

Use the latest smartphone apps with Apple CarPlay and Android Auto.

Product features and specs are identical to INE-W611D, but includes trucking software

Built-in Navigation

The built-in iGo Primo nextgen navigation system uses TomTom maps and comes with pre-installed maps for 48 European countries. Select from thousands of POIs to find gas stations, restaurants, sightseeing spots and much more. Important buildings are shown as 3D icons to draw your awareness, while lane guidance informs you in which lane to drive to not miss any exit.

Built-in DVD / CD Drive

Enjoy movies or TV shows from DVD while your vehicle is standing still or listen to music from CDs. The INE-W611D is also compatible with DVD-R /-RW and can playback DivX files.

Dual USB Port **2xUSB**

2x USB ports are built-in for more flexibility. You can for example charge your phone on USB port 1, while connecting a USB stick or hard-drive on port 2 to listen to MP3, FLAC, WMA or AAC audio files or view video files in MP4, h246, MKV and AVI files. The USB ports support up to 1.5 Ampere for quick charging speed and external HDD power support.

Apple CarPlay / Android Auto Compatibility

If your smartphone is compatible with either Apple CarPlay or Android Auto, you can connect it via USB cable to your Alpine unit and use authorized apps on the 6.5" touch-screen. Both platforms offer a continuously growing variety of navigation apps, music apps, internet radio players and communication apps to choose from, to make your car rides more enjoyable.

Alpine Advanced Dash Cams

A dash cam is an on-board camera that continuously records the view through the vehicle's front windshield. The recorded footage can be used as evidence in the event of a road accident. When parked, dash cams can capture video and picture evidence if vandalism is detected. Alpine offers a high-end dash cam that includes drive assist functions, as well as a regular recording model. There are optional rear accessory cameras available for both models.

Adventure Audio for
Fiat Ducato 3

Upgrade your Fiat Ducato 3 (X290 or X250) or Ducato-platform motorhome with this amazing 3-stage sound system. For the best sound quality and performance we recommend to combine all 3 systems for a true Concert Ensemble sound experience.

You Tube

Stage 1 — On-Dash Radial Speaker System

SPC-R100-DU

12cm Radial Speaker System (45W RMS)

You can drastically increase the sound quality by adding full-range, radial speakers on top of your dashboard. The SPC-R100-DU comes with custom-fit brackets for on-dash mounting and do not require any holes to be cut into the dash. The 12cm radial speaker design creates an excellent sound stage in the cabin and strongly improves the vocal sound quality. Especially vocals appear much clearer when listening to news or podcasts. The speakers are compatible with X290 and X250 vehicles and do not interfere with "Remifront" or other windshield blinds.

Stage 2 — Subwoofer System Upgrade

SWC-D84S

Custom 20cm Subwoofer System

By adding this custom subwoofer system in your Ducato's center console, the bass sound will strongly improve. The subwoofer's sealed enclosure integrates perfectly below the cupholders for a real stealth installation (factory installed cupholders are mandatory). The 250 Watts shallow type subwoofer with dual voice coils gets connected to the rear channel output of your factory or aftermarket radio system. We recommend to use the SWC-D84S together with the SPC-R100-DU and the SWA-150KIT for the best, concert level sound experience.

Stage 3 — Amplifier Upgrade (for Subwoofer)

SWA-150KIT

2-Channel Amplifier System

You can further improve the bass output and dynamics of your SWC-D84S subwoofer system by adding this 150 Watts 2-channel power amplifier. The amplifier itself can be easily installed in the compartment behind the cup holder. There is also a wired bass remote controller included, that can be installed in the dashboard for quick and easy access to the bass power adjustment. Additionally, we have included a full wiring harness for easy plug-and-play installation with your Head Unit. If you have the VP1 or VP2 original radio, you will additionally require a 52pin /ISO cable adapter.

Adventure Audio

Adventure Audio for
Volkswagen T6.1 / T6

Whether you use your Volkswagen T6.1 / T6 as a transporter, family van or camper van - a good sound system can turn any drive into a more fun experience. Alpine offers several sound components for these vehicles to achieve your desired audio experience. They are not only a joy to listen to, but also a breeze to install, and their distinctive design will spruce up any cockpit without spoiling the original cabin cosmetics.

You Tube

EISA AWARD
Best Product
2021-2022
IN-CAR CAMPER VAN COMPONENTS
Alpine Adventure Audio

Stage 1 — Adventure Audio Component Speaker Systems

Your Volkswagen never sounded so good

Bring high-fidelity audio to your Volkswagen T6.1 / T6 at an affordable cost with these Adventure Audio speaker systems. From deep, rich bass to accurate mids and crisp, clean highs – you will hear every note with a new sense of clarity. The speaker systems handles up to 180 Watts peak power and provide an audiophile listening experience. The included 28 mm audiophile-grade silk dome tweeters with back-chambers feature stunning clarity and fast dynamics.

Designed to be seen and heard

The first thing you will notice about these speakers are the beautifully designed stainless steel tweeter grills in the A-pillars, that replace the original plastic VW grills. We use a cutting-edge chemical photo etching process for highest aesthetics and acoustics performance, to make them look stunning from every angle – yet acoustically optimized and virtually transparent to the sound waves passing through them.

Volkswagen T6.1 / T6 Adventure Audio Speaker Systems

Vehicle	Model	Type	Power Handling
Volkswagen T6.1	SPC-106T61	2-Way, 16,5cm Component	60W RMS / 180W max
Volkswagen T6	SPC-106T6	2-Way, 16,5cm Component	60W RMS / 180W max
Volkswagen T6	SPC-108T6	2-Way, 20cm Component	100W RMS / 300W max

---

Stage 2 — Adventure Audio DSP Amplifier / Subwoofer System

550W Max DSP Amplifier for excellent sound quality

Upgrade your Alpine Adventure Audio speaker system for Volkswagen T6.1 or T6 to the Concert Ensemble with this 550 Watt 6-Channel DSP amplifier / subwoofer system. This sound upgrade will add lots of power output, dynamic and bass to your existing Alpine speaker system to achieve the ultimate listening experience in your vehicle. The 550 Watt DSP amplifier is pre-programmed to perfectly match the sound characteristics of the T6.1 / T6.

Powerful Bass Upgrade

Enjoy strong, powerful bass with the included 180 Watt subwoofer to make all your audio tracks sound even more exciting. The dual-coil subwoofer comes pre-installed in a sealed wooden enclosure, installed under the passenger's seat of your T6.1 or T6. It is also compatible with the rotary seats of the California version, as well as the seating bench of the Caravelle van (installation position for Caravelle with 2-person bench is under the driver's seat).

Volkswagen T6.1 / T6 DSP Amplifier / Subwoofer Systems

Vehicle	Model	Type	Power Output
Volkswagen T6.1 / T6 with OEM radio	SPC-D84AT6	6-ch DSP amp / 20cm sub	550 W total max
Volkswagen T6.1 / T6 with Alpine radio	SPC-D84AT6-R	6-ch DSP amp / 20cm sub	550 W total max

Adventure Audio for
Mercedes Sprinter 907 / 910

Upgrade your Mercedes-Benz Sprinter 907 / 910 with the new SPC-106S907 high-end component speaker system. This Alpine Adventure Audio system for the MB Sprinter perfectly unites function with form: enjoy audiophile grade sound quality, while the beautiful photo-etched stainless-steel tweeter grills simply look stunning on your dashboard. You can further upgrade your system with a DSP amplifier / subwoofer system.

Stage 1 — Adventure Audio Component Speaker Systems

Made for Mercedes Sprinter 907 / 910

28 mm audiophile-grade silk dome tweeters with back-chambers produce crisp, clean highs that let you hear every note with stunning clarity and fast dynamics. Our sound engineers also created audio optimized tweeter installation brackets for the dashboard, allowing the tweeters to point right at the listeners in the cabin. These tweeter brackets are fully compatible with the Mercedes windshield blinds.

Dynamic mid-bass experience

The Alpine-designed dynamic mid-range speakers produce a wide frequency range that uncovers the rich details of every audio track – delivering your favorite songs with powerful mid-bass and amazing texture and accuracy. The included steel base rings ensure a rock-solid, vibration free connection to the door frame and perfectly seal the door interior from moisture due to the attached silicone seals.

Mercedes Sprinter 907 / 910 Adventure Audio Speaker Systems

Vehicle	Model	Type	Power Handling
Mercedes Sprinter 907 / 910	SPC-106S907	2-Way, 16,5cm Component	60W RMS / 180W max

Note: if your MB Sprinter is equipped with the 10" MBUX system, please additionally install the EXA-21CA252 center speaker adapter

Stage 2 — Adventure Audio DSP Amplifier / Subwoofer System

Upgrade to Concert Ensemble

If you have already installed an Alpine Adventure Audio speaker system in your Sprinter 907 / 910, you can further upgrade your sound experience to the Concert Ensemble with the SPC-W84AS907 for even more dynamics, power and bass, as well as a better staging with digital time correction. Enjoy your favorite tunes with the unparalleled Adventure Audio listening experience.

More power, more dynamic

The Alpine 550 Watt DSP amplifier ads much more power and dynamic to your entire sound system and additionally drives the included 300 Watt dual-coil subwoofer. The DSP amplifier is pre-programmed to perfectly match the sound characteristics of the Sprinter 907 / 910 cabin, but can be further adjusted for steering wheel configurations (left or right), radio type and other factors. Note that there are 2 different versions available, depending on your radio type.

Mercedes Sprinter 907 / 910 DSP Amplifier / Subwoofer Systems

Vehicle	Model	Type	Power Output
Mercedes Sprinter 907 / 910 with OEM radio	SPC-W84AS907	6-ch DSP amp / 20cm sub	550 W total max
Mercedes Sprinter 907 / 910 with Alpine radio	SPC-W84AS907-R	6-ch DSP amp / 20cm sub	550 W total max

Alpine F#1 Status

Experience music so realistic you are immersed in every note

Hi-Res AUDIO
384kHz / 32bit

The First Full-Spec Hi-Res Vehicle Sound System

By maintaining the details produced in a recording studio, the AlpineF#1Status system delivers music just as the artist intended - resulting in the excitement of a live music performance. The 3rd generation AlpineF#1Status is the world's first car audio system, capable of reproducing music at 384kHz / 32bit, resulting in a 17x higher sampling rate compared to CD audio playback. This system is truly the pinnacle of audiophile car-audio technology.

Perfect Synchronisation

Alpine developed a Master Clock Management System, which uses a centralised, highly accurate "master clock" that completely synchronises the audio signal between the Head Unit and the audio processor, virtually eliminating all jitter (signal misalignments) during the transmission. AlpineF#1Status is proud to be the first complete car audio system that utilises this architecture.

Alpine F#1Status

DAP-7909
Digital Audio Player

This Alpine edition of the famous DAP by Astell&Kern features 384kHz / 32bit playback and includes an Octa-Core CPU plus an AK4497EQ Dual DAC for highest sound quality possible.

HDS-7909
Head Unit / USB Controller

A modern homage to vintage Alpine Head Unit design: the HDS-7909 Head Unit features a full color display, 2 USB ports and is compatible with WMA, OGG, AAC, MP3, FLAC and WAV files up to 384kHz / 32bit.

HDP-900
Digital Audio Processor

The processor is the core of the system, processing audio files at 384kHz / 32bit without downsampling. It ultra-high audio specs, such as 34-band P-EQ per channel, 8-channel digital time correction and a state-of-the-art master clock system.

HDA-F900
Digital Amplifier (set of 2 pieces)

The 4-channel, Class-D amplifier features UltraBlu technology for highest possible sound quality and uses 8 Volts balanced XLR inputs. Power output 4 x 100 Watts RMS @ 4Ω. Frequency response: 4Hz - 100kHz @-3dB

HDZ-9000
4-Way Speaker System

Consisting of 18cm door woofers (1 pair), 8,5cm mid-range speakers (1 pair), 7cm ring radiator tweeters (1 pair) and a 30cm Subwoofer (1 unit), this 4-way speaker system has been developed for perfect tonal harmony and best possible sound quality.

Note: The AlpineF#1Status system is only sold as a full system - no single component sales.

For more information on AlpineF#1Status, please visit: **https://www.alpine.com/flagship/eu/**

Alpine Status

Hi-Res Audio Made Accessible

The Alpine Status system features many technologies, components and materials of the AlpineF#1Status system to achieve ultra high-precision music reproduction - at an affordable price tag. High-Res Audio playback of 192kHz / 24bit allows Alpine Status to create a heightened listening experience in the vehicle that emulates the feeling of an intimate recording studio session.

Hi-Res AUDIO — 192kHz / 24bit

HDS-990
HI-RES AUDIO HEAD UNIT

The HDS-990 is the best way to bring Hi-Res Audio sources into your Alpine Status system and control all settings. It uses a compact system controller panel with hide-away black-box for great installation flexibility. The hi-res color display shows all playback data including album cover artwork. It also includes a 6-Ch 31-band EQ, X-Over and Digital Time Correction.

Hi-Res Audio Playback

The Alpine Status system is designed to process and playback Hi-Res Audio files at 192kHz / 32bit- which is the current industry standard for purchasing and streaming Hi-Res music. You can connect audio sources via 3x USB ports or stream music wireless to your HDS-990 Head Unit.

System Flexibility

This Head Unit features high-performance RCA outputs, an optical TOSLINK port as well as 4x 50Watts hi-resolution amplified speaker output options for wide system building flexibility.

Input	4ch Hi-Level, AUX, Bluetooth Audio, USB Strage 3 Inputs (Front x1, Rear x2), USB Audio
Output	25W RMS x 4ch Amplifier, Optical/Coaxial, 6ch RCA
DSP	6ch 31 Band EQ, X-Over, Time Delay
Decoding	MP3, WMA, AAC, MP4, WAV, FLAC, APE, DSD
System Sampling Rate	192kHz/32Bit
Frequency Response	20Hz-40kHz (Hi-Res)
Size (mm)	W178xD143.6xH50 (Main Unit)
System Connectivity	Opt/Coax to DSP Amplifier or 6ch RCA to Amplifier (with 4ch Hi-Level Input), 4ch Built-in Amplifier and Subwoofer Amplifier (with 4ch Hi-Level Input)

HDP-D90
HI-RES AUDIO DSP AMPLIFIER

This DSP amplifier uses many components and technologies of the AlpineF#1Status processor for audiophile sound quality and is very flexible with tons of different input and output capabilities. It runs an internal sampling rate of 192kHz / 24bit and features a 14-Ch 31-band P-EQ, 3-Way X- Overs and 12-Ch digital time correction with 7mm steps adjustment.

Audiophile Sound Quality

The HDP-D90 features an ultra-wide Hi-Res Audio bandwidth of 10Hz to 110kHz. Very low phase shift and distortion ensure high quality static performance and great imaging. The copper plated chassis and other features bring the signal to noise ratio to >110dB. The heart of the system is the high-class XO internal clock generator - the same component used in the AlpineF#1Status processor HDP-900.
External Alpine Status amplifiers will become available later in 2022.

Input	12ch Hi-level, 2ch RCA, Optical/Coaxial, Bluetooth Audio
Output	50W RMS x8ch + 80W RMS x4ch Amplifier, 10ch RCA
DSP	14ch 31 Band P-EQ/G-EQ, 0~20ms Time Delay, 20Hz~40kHz X-Over (-6dB~-48dB/oct slop)
System Sampling Rate	192kHz/32Bit
Frequency Response	20Hz-40kHz (Hi-Res)
Size (mm)	W278xD256xH58 (Main Unit)
System Connectivity	External Bluetooth Unit, Head Unit Commander Operation, Optional Controller

Alpine Status

AlpineF#1Status Heritage

These speakers get very close to the AlpineF#1Status speakers look and feel, using a very similar constructing and motor assembly, as well as the identical build-materials for highest sound quality.

Clear Sound & Low Distortion

Many key features and technologies, such as the double-gathered surround, are AlpineF#1Status trickle-down features and ensure very clear sound output with lowest distortion.

Unified Timbre Identity

The woofer, mid range and tweeter use Carbon composite cones to achieve a fully unified timber identity - resulting in excellent harmonics.

Slim-Fit Tweeters

The tweeters of the HDZ-653S and HDZ-65CS include a smaller tweeter version (Slim-Fit), that is easier to integrate in original tweeter installation locations.
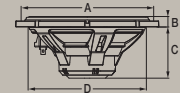

7cm Alpine Status Tweeter   4,4cm Alpine Status Slim-Fit Tweeter

SPEAKERS
ALPINE STATUS HI-RES SPEAKERS

Drawing from AlpineF#1Status trickle-down technology and materials, these Hi-Res Audio certified speakers deliver highest audiophile sound quality up to 40kHz in your vehicle. They are available in different configurations to match your needs.

HDZ-110
ALPINE STATUS 11" SUBWOOFER

The HDZ-110 subwoofer was co-developed with all other Alpine Status system components to perfectly match the overall timber identity. It features a 400W RMS / 800W peak power handling and includes a hybrid carbon cone, as well as a doubled-gathered surround for maximum cone excursion with highest control and stability. The frame is crafted of die-cast aluminum and includes screw-type terminals for the dual 4Ω coils. A very large and powerful Neodymium magnet ensures a maximum motor-force for powerful bass output.

R-SERIES

Powerful Bass and High Clarity

R-Series speakers and amps are engineered to deliver prodigious power while maintaining extreme sound clarity for totally exciting sound.

They provide high power output and handling, wide frequency response and a powerful bass. The R-Series line includes component and coaxial speakers, subwoofers and for the first time, amplifiers.

New 3-Way PRO Component Speakers

The PRO versions feature rigid die-cast aluminium baskets for higher stiffness and build-quality and are available in a 3-way (16,5cm woofer, 10cm mid-range and 4,4cm tweeter) and 2-way configuration. The standard R-Series speakers feature composite baskets and are available in 2-way component and coaxial variations. This gives you many choices based on your needs and your budget.

Professional Speaker Network

The all new speaker networks are much larger compared to the 2nd generation R-Series, to include more and better components and many tuning options. This gives installers many possibilities to adjust the sound perfectly for your vehicle.

Meet the 3rd generation of Hi-Res Audio Ready R-Series speakers: choose between a range of PRO and standard versions.

R-Series Technology

The 3rd generation of R-Series speakers feature a more powerful motor structure (larger magnet size and 35mm voice coil) for increased SPL and bass output and less distortion. The new glass-fibre reinforced cone delivers warm, natural sound, while the HAMR surround ensures maximum cone excursion and control.

Hi-Res Audio Tweeters

The all-new magnesium hard dome tweeters deliver clear, detailed music reproduction and are designed for true Hi-Res Audio playback even beyond 40kHz.

With their high power output, the all new Alpine R-Series amplifiers are a perfect match for the R-Series speakers and subwoofers

High Performance and Sound Quality

R-Series amplifiers are built on the X-Series Alpine-proprietary circuit design, that achieves class-leading power density and reliability while performing at the top of its class. By simplifying the circuit topology, Alpine is able to ensure the cleanest possible signal path. This clever design results in a frequency response that meets the Hi-Res audio standard of 40kHz. They maintain a very low phase shift throughout the music spectrum, which allows your music to stay faithful to the original recording. The amps also include many Alpine custom internal components to achieve excellent sound quality.

The new 2022 R-Series subwoofers provide lots of deep, clean, accurate bass and feature many innovations.

The Next Evolution of Proven Performance

The new 2022 R-Series subwoofers are here - drawing from decades of Subwoofer engineering experience. They deliver deep, clean, accurate bass and feature Alpine's HAMR Surround for maximum cone excursion, delivering tons of bass output. the new ceramic dust cap is very light weight and rigid, keeping distortion an absolute minimum. The new, enlarged motor structure ensures better overall woofer control for a clean, strong bass response.

Amazing Speakers to Fit Your Car and Your Budget

The all-new Alpine S-Series speakers deliver amazing sound quality and go easy on your wallet. They feature the Alpine HAMR surround for high linearity and accuracy, as well as a new patented CFRP cone for excellent clarity and responsiveness.

Optional Grilles

The S-Series speakers come without grilles. Optional grilles are available as shown here.

S-Series Speaker Grilles	
KTE-S65G	For use with S-S65C and S-S65
KTE-S50G	For use with S-S50
KTE-S69G	For use with S-S69C and S-S69

All-new S-Series Amplifiers

Alpine introduces the all-new S-Series amplifiers, that are a perfect match to the S-Series speakers. These amps have an excellent Watts-per-Euro ratio in the Class-D category and feature a very high heat resistance and won't shut down due to overheating.

High Power Handling

The new Type-G Series of component and coaxial speakers are designed and built to handle high power levels.

Ease of Installation

Snap Fit tweeter, swivel mount, and flush install bracket make installation easy. The crossover network is small and can be separated into two parts to further reduce size and allow use of factory wiring.

Good Sound Quality

They deliver good sound quality, due to a soft dome tweeter, square voice coil wire with Kapton VC bobbin and an audio tuned capacitor.

All-In-One Sound Upgrade for Any Vehicle

Achieving a perfectly integrated, high-performance car audio installation with only one device is now possible with the new Alpine PWD-X5. This very unique sound system upgrade product includes a high-performance Digital Sound Processor (DSP), 4-channel amplifier for your front and rear door speakers, as well as an ultra-flat active subwoofer. The small footprint allows the PWD-X5 to be easily installed inside the car's cabin to enjoy a nice bass upgrade.

Compact installation

The very compact measurement of only 350mm length x 245mm width x 80mm height allows the PWD-X5 to be installed under the front seats of many vehicles.

350mm

80mm

245mm

Extensive sound tuning functions

Use the built-in 10-band Parametric EQ, digital time correction and digital crossover to tune the sound of your vehicle. You can do the main setup by connecting a PC using the free Alpine software or via the included wired controller.

Wide connectivity options

You can connect the PWD-X5 to an Aftermarket radio using RCA inputs. If you have an original radio in your car that has no RCA connections, you can connect it to the DSP amplifier using the high-power inputs.

Bluetooth®

Bluetooth® Audio Streaming

With the included Bluetooth® dongle that can be plugged in to one of the USB ports on the DSP amp, you can stream music from your smartphone to the PWD-X5.

Get the Smartphone App

You can download the Alpine companion app for the PWD-X5 from Google Play and the Apple App Store free of charge.

Available on the App Store

GET IT ON Google Play

Compact Ad-on Amplified Subwoofers

These amplified add-on subwoofers are very compact and can be installed under the driver seat or other locations inside the vehicle's cabin. This is an easy and space saving way to add a good bass performance to your OEM or aftermarket audio system. Both subwoofers feature high-level inputs, to make it very easy to add them to an OEM speaker system.

POWER SUPPLY   SPEAKER OUPUT   INPUT

Key Features:

Professional sound tuning for any vehicle

Full flexibility with 6 input channels for high- and low power signals, as well as 8 output channels for extensive system building.

Audiophile tuning features

Get 30 bands of Parametric EQ per channel, as well as 8 channel digital time correction and crossover for expert sound tuning.

Wireless System Control

Control key functions via smartphone app and wireless connection for real-time adjustment.

Compact size

The small footprint and size of the DSP amp makes it easy to install anywhere in the vehicle.
Measurements: 205mm x 150mm x 50mm.

Pure Class-D technology

Once an analog input signal is converted to digital, it remains fully digital throughout the entire processor and amplification stage.

Start-Stop engine unaffected

The DSP amp will remain in full operation if your car is running on start-stop mode.

Setup and sound tuning by PC

Download the Alpine configuration software and connect your PC via USB to the DSP amp. You can control the full channel setup for inputs and outputs in the graphical user interface and adjust all sound settings from Parametric EQ, digital time correction to crossover settings. Compatible with Windows XP, 7, 8 and 10.

Get the Alpine Remote App

Download the Alpine Remote App to your Apple or Android smartphone and connect it to the DSP amplifier via WiFi connection. This app allows you to adjust volume, subwoofer level, source selection and load presets in real-time. The Alpine remote app is available free of charge in the Apple App Store and Google Play store.

Blue illumination Window

Acrylic windows provide an inside view and the blue illumination adds a cool effect. Its fully enclosed structure ensures that nothing sliding around in the trunk damages the woofer.

The SBG ready-to-use box line is the best-selling subwoofer in Europe. It has been praised for its bass-oriented design. It is characterised by its performance, stylish appearance and affordable price point.
